SKILLS

Languages and Frameworks: HTML, CSS, JavaScript, React, Next.js, Node.js, Express.js
Databases: Firebase, MongoDB
Other Skills: Git, GitHub, Figma

PROJECTS

Real-Time Chat Application   **May 2025 – June 2025**

- Developed a responsive real-time chat application using **React.js**, **Node.js**, and **Socket.IO**, with over **200+ messages exchanged** during user testing.
- Implemented **real-time messaging**, **user authentication**, and **Responsive UI design**, improving interaction speed by **90%** compared to traditional polling.
- Integrated **MongoDB** for persistent chat storage and Cloudinary for efficient and secure image upload and storage.
- Achieved **<150ms average message latency** across tested connections and ensured smooth performance on both desktop and mobile devices.
- Deployed on **Render** with stable performance and fast response times observed during development and limited user testing.
- **GitHub Repository**: https://github.com/Danish0111/Chatter
- **Live Demo**: https://chatter-4c4a.onrender.com/

Portfolio Website   **January 2025 – April 2025**

- Developed a **fully responsive**, dynamic portfolio using **React.js**, showcasing projects, skills, and achievements to over **100+ unique visitors**.
- Structured the site with a **modular, maintainable architecture**, enabling quick updates through a connected **Firebase backend**.
- Enabled **smooth scrolling** on larger screens and configured **dynamic routing** to enhance navigation on mobile devices.
- Designed and integrated real-time content updates, resulting in **50% less deployment time** for future content changes.
- Focused on performance, accessibility, and user-first design to ensure fast load times and mobile compatibility.
- **GitHub Repository**: https://github.com/Danish0111/MyPortfolio
- **Live Demo**: https://danish-webdev.vercel.app/

E-commerce Website   **February 2024 – July 2024**

- Developed a feature-rich, fully responsive e-commerce website using **React.js** and **Node.js**, with **dynamic product listings** and user authentication.
- Used **Strapi CMS** to manage products and content dynamically, allowing **real-time updates** through an intuitive admin panel.
- Integrated a modular architecture with **secure API routes** to enable smooth data flow between frontend and backend.
- Optimized backend performance and frontend API consumption, **reducing page load times by 50%**.
- Implemented **cart functionality, dynamic routing**, and order summary features to enhance the shopping experience.
- Focused on **responsiveness**, accessibility, and SEO, resulting in high performance across devices.
- Enabled role-based access control for administrators to manage products and orders without touching code.
- **GitHub Repository**: https://github.com/Danish0111/XStore
- **Demo**: https://drive.google.com/file/d/1dTVW8Av9WAv_B8v5jzBKQzBkKzosaY2V/view?usp=sharing

EDUCATION

Global Institute of Information Technology   **Aug 2023 – Present**
Bachelor of Computer Application   *Greater Noida, Uttar Pradesh*

Awards & Achievements

IILM Hackathon by Google Developer Groups – Participant

- Collaborated in a **team of 4** to develop a web-based solution for real-time disaster detection, user alerts, and emergency coordination.
- Competed **among 100+ participants**.

ADDITIONAL

- Proficient in video editing using **CapCut**.
- Own a YouTube channel with **50K+ subscribers**, showcasing skills in content creation and audience engagement
